

a worldwide investigation into the future of cities

UNDERSTANDING CITIES | URBAN AGE DEBATE SERIES

As engines of growth and social integration, cities are the magnets for more than half the world's population. "Understanding Cities" is a public debate addressing the complexities involved in designing and running the powerhouses of global culture and the economy. This series will address the most provocative ideas in city-making, including environmental responsibility and climate change, social cohesion and the built form of cities.
